

Splashbus Rotterdam A unique experience

A tour with this unique Splashtours amphibus will be an unforgettable experience for young and old alike. The amphibus will first take you by the most beautiful and unique places in Rotterdam before it makes the spectacular 'splash' into the river Maas.

The bus turns out to be a seaworthy boat that will take you by the magnificent Rotterdam skyline. Splashtours's carefully designed tour thus treats you to best this city has to offer.

2 worlds

Protecting an amphibian poses both regulatory and technical challenges. As soon as it concerns a ship and more than 12 passengers inland shipping rules regarding safety and equipment apply, while on the road the systems will soon have to comply with the UNECE Regulation 107.

Challenges

Their lack of space makes it challenging to install a fire extinguishing system in a ship of vehicle. Combine the two and it is even more of a challenge. This is where the AF-X Fireblocker carbon units come in: they are compact and their actual capacity to do the job is large. The units are easy to install and connection to the wheelhouse is a matter of plug & play thanks to their integrated connector. Installation and maintenance was never easier.

AF-X fire extinguishing system :

- compartment: engine
- volume: 8m3
- units: 2x AF-X Fireblocker Carbon CS
- activation: manual
- detection: temperature detectors

Prevent fire with AF-X Fireblocker.

Fire causes enormous damage. Most fires develop from a short circuit in, or overtaxing of engines or equipment. Unseen. Unnoticed. Undiscovered until late, and more often than not even far too late. AF-X Fireblocker is one of the few systems that operate from within and blocks the fire directly at the spot that until now could not be protected: right at the seat of the fire.

Built-in fireman

Originally developed for space travel, AF-X Fireblocker serves as a built-in fireman and swiftly blocks the fire with a dry aerosol compound. From the very first spark. Without using water. Completely harmless to man, beast and the environment and with no threat to business continuity. Low purchasing costs, low installation costs and low maintenance costs. No need for constructional provisions. Long life. No consequential loss. In other words: an annual cost saving of many, many euros.

af-x fireblocker | faster than fire.
